

Kemble Rock 200 Ride Report

August 9, 2008

Carey Chappelle

We had 5 riders for the new Kemble Rock 200 yesterday. Weather was RAIN, RAIN and some more RAIN! The wind didn't hurt us too much and we did get an hour of sunshine. On this day, 6 Control points were advantageous but I am going to reduce to 4 Controls for future rides. . The men loved the scenery and on a sunny day, it would have been even better. After calling my wife from Hepworth (couldn't see outside Tim Horton's due to the rain), she simply asked if any of the riders would be interested in a BBQ'd Steak dinner once we arrived back in Port Elgin..needless to say, I didn't have to convince them and we did have a great feast before they all left. As far as hills, this ride has a few more than the South Bruce 200 but nothing compared to the rest of our brevets.
